

NEW CONNECTION FEES - SEWER

New or upsized connections to the Silver Lake Water & Sewer District's (District) system are assessed a new connection charge to pay for capital improvements. These new connection charges are assessed per meter size or number of dwelling units as adopted by Resolution No. 651. There are two sewer basins, the Everett and Alderwood Basins, each with their respective connection fee.

Customers may provide the District with a building permit issued prior to August 14, 2010, to be assessed the previous General Facility Charge.

New or upsized sewer connections may also be required to pay developer reimbursements, system development fees, ULID assessments, or other fees depending on the property location.

For more information, please contact the District at 425.337.3647.

NEW CONNECTION FEES - SEWER

In addition to the Silver Lake Water & Sewer District's (District) new connection charges and fees, all new sewer connections in the Alderwood Basin must include a completed King County Metro Capacity form and either a letter from Alderwood Water and Wastewater District outlining the General Facility Charge due to Alderwood Water and Wastewater; or a paid invoice of the Alderwood Water and Wastewater District General Facility Charge before the District can issue a sewer permit.

King County Metro will bill property owners directly for their capacity charge.

Alderwood Water and Wastewater District will either collect their General Facility Charge directly, or issue a letter to the District outlining the new sewer connection charge for the District to collect.
